[(xxx) xxx-xxxx]
[hiring.manager@gmail.com]

Dear [Mr./Mrs./Ms.] [Manager's Name],

I was pleased to learn about the available Marketing Assistant role with [COMPANY] on [WEBSITE]. With my Bachelor of Marketing and 6+ years of experience supporting Marketing Managers in the delivery of renowned marketing services, I am confident I can contribute to the ongoing success at [COMPANY].

Throughout my previous Marketing Assistant roles, I have gained invaluable experience conducting in-depth market research, creating distinguished marketing campaigns, and providing elite brand management services. I supported marketing managers in the creation of international and multilingual campaigns for influential market leaders. Furthermore, I developed outstanding technical skills related to keyword research, SEO/SEM optimization, A/B testing, and targeted email campaigns.

I boosted awareness and engagement of client's social media accounts through quality organic content and employing creative techniques such as user-generated content campaigns. Lastly, I gained invaluable experience in market validation and rebranding methods for large multinational companies. Highlights of my qualifications from previous employment include:

- Assisted the Marketing Manager in the creation of an international marketing campaign airing in ten countries and requiring translation into six different languages for Domino's Pizza
- Created a personalized and targeted email campaign for Carrie's Shoes, resulting in a 35% increase in click-through rates
- Increased conversion rates by 10% on a client's web-based service offering through SEO/SEM campaigns
- Produced reports providing in-depth analysis of current market share distributions and projected market share acquisition for potential new clients

I am delighted to have the opportunity to collaborate with the talented professionals at [COMPANY]. Thank you for your time and for considering my candidacy for the position. I look forward to setting up an interview in the near future.

Sincerely,

[YOUR NAME]

SAM SMITH

Madison Employer

Recruitment Manager

STP Engineering

1 Grove Avenue

Montgomery, AL 36109

Dear Madison,

I want to express my excitable interest in the engineering internship you are offering at STP Engineering. As a final year General Engineering student at the University of Montgomery, I maintain a 3.75 GPA and have made the Dean's List every semester, setting me up with a solid foundation to get a taste of real engineering at STP.

As well as maintaining these grades, I am also one of the team leaders of the Engineering Society, where we build machines that compete with each other on tasks, and an engineer in the Robotic Society, where we build machines that duke it out with each other to death, most days. During our largest competition of the past year, we competed to build an e-bike that would climb the maximum incline, and also for a 1-km actual hill climb race outdoors. I used CAD and automated CNC to fabricate ultra-light aluminum rear stabilizer wheels, with raised edges that allowed us to fit strips of solid rubber into the wheel, providing traction, and not having to fabricate the wheel to fit an existing tire. Our bike, powered by a rear hub drive, instead of a pedal assist, beat the next team on the incline by 14 degrees (40 degrees), and the last by 21 degrees. As the chief designer and fabricator behind the stabilizer design, I have exhibited outside-of-the-box thinking, and sacrificed a few pounds for increased stability and traction that would ace the harder task.

With these challenges, as well as subjects of my study, I am often able to find the innovative solution that will beat out the others, and have together with my team been crowned The Engineering Society best team in 2019. I am extremely interested and excited how my approach will fare in the world of real engineering, with real, complex, new problems, and I am excited to see how I could grow and what I could learn at a cutting-edge company such as STP.

When could we schedule a call or a meeting for me to tell about the other crazy robotics projects we made?

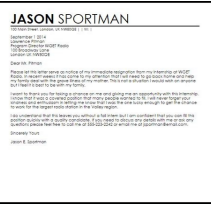

Best Regards,

Gregory B. Olmos
